Dear Clients

With the recently announced pandemic by the World Health organization, Hypnocare hypnosis clinic is committed to Safe practices in line with health updates being provided to the community.

I would like to reassure you that I am committed to the health of the community broadly and have a heightened awareness of hand and environmental hygiene, as well as my own health status.

What does this means for you?

I will take the time between client visits to wash my hands and wipe over surfaces

I will also not attend work if I have a cold or flu symptoms that may put others at risk.

What does this mean for myself.?

I ask that you are also aware of your own hand hygiene and health status.

As the Director of Hypnocare Hypnosis Clinic I would like to personally thank you for continuing to support my business, and particularly at this time of community disruption.

I would also like present and future clients to know that in certain situations, online sessions are available through Zoom.

Regards

Linda Milburn
